Summary

Aspiring software developer with practical full-stack development experience gained through an in-house developer internship, professional training and personal projects. Experienced with JavaScript, [Vue.js](#), [Node.js](#), MySQL, React and modern web development practices. Built and contributed to full-stack applications involving RESTful APIs, CRUD functionality, databases, responsive interfaces, and front-end/back-end integration. Eager to learn from experienced developers, take ownership of assigned tasks, ask questions when needed, and contribute reliably to a collaborative development team.

Skills

Languages: JavaScript, TypeScript, HTML, CSS, PHP

Frameworks and Libraries: [Vue.js](#), [Node.js](#), React, [Next.js](#)

Databases: MySQL, PostgreSQL

Development: RESTful APIs, CRUD Operations, Responsive Web Design, Front-End/Back-End Integration

Tools and Platforms: Git, GitHub, VS Code, Vercel, Netlify

Experience

In-House Intern Developer

Life Choices | April 2026 - Present

- Contributed to the development of an **attendance tracking application using OOP PHP**, including backend authentication, frontend-backend integration, cache-clearing functionality, and deployment to **Xneelo**.
- Implemented and integrated backend authentication functionality with the frontend, troubleshooting integration issues and collaborating with teammates to resolve development challenges.
- Developed a **Flutter job-search and youth opportunities application**, working as part of the integration team to connect application data with **Google Sheets** and configure the required Google service logic.
- Contributed to integrating the Flutter application's UI with backend logic, while implementing caching functionality to improve application performance and data handling.
- Developed features for a **React service-finder application using React Leaflet**, integrating an interactive map for locating nearby services such as clinics and transportation.
- Worked on **map marker clustering and performance optimisation**, ensuring the map remained responsive with larger datasets and under throttled 3G/4G conditions.
- Developed **high-demand service area functionality** using marker density and clustering concepts, including cluster counts, map overlays, filtering integration, caching, and fallback handling for unavailable API data.
- Used **Git, collaboration, debugging, documentation, and online technical resources** to investigate problems, ask questions when blocked, and implement solutions effectively.

Projects

Facel.T - E-Commerce Store | Vue.js | Node.js | MySQL

- Developed a full-stack e-commerce web application for browsing and purchasing products.
- Built responsive product pages, shopping cart functionality, and checkout flows.
- Implemented CRUD operations for managing products and user interactions.
- Integrated front-end functionality with back-end services and MySQL data.
- Designed a clean, user-friendly interface with a focus on usability and responsive design.

Modern Tech - HR System | Vue.js | Node.js | MySQL

- Developed a full-stack mentorship platform with user profiles and messaging functionality.
- Built responsive forms for user input, profile management, and communication.
- Integrated front-end and back-end functionality for handling user data.
- Worked collaboratively on project requirements and implementation.
- Focused on accessibility, usability, and responsive behaviour across different devices.

Oracle APEX Data System | MySQL | Oracle APEX

- Structured and organised data to support clear reporting and usability.
- Managed database content to improve readability and decision-making.
- Created user-friendly data views for non-technical stakeholders

Education

Full-Stack Development Certificate | Life Choices Academy | September 2025 - May 2026 | Cape Town

- Developed practical full-stack applications using JavaScript, Vue.js, Node.js, and MySQL.
- Built RESTful APIs and implemented CRUD functionality.
- Developed responsive web interfaces and integrated front-end and back-end services.
- Applied Git and version control practices.
- Gained practical experience with application deployment using Vercel and Netlify.

Full-Stack Development Certificate | FNB App Academy | May 2025 - August 2025 | Online

- Developed foundations in HTML, CSS, JavaScript, and Python.
- Gained exposure to Django for back-end development.
- Learned software development lifecycle concepts, design thinking, and user experience principles.

Full-Stack Web Development Certificate | Codeeza Bootcamp | November 2024 - May 2025 | Cape Town

- Built projects using JavaScript, TypeScript, React, Next.js, and PostgreSQL.
- Developed responsive user interfaces and integrated front-end applications with back-end services.
- Applied version control and deployment practices.

National Certificate | Meridian Pinehurst | 2019 - 2023 | Cape Town

Certifications

Generative AI - WeThinkCode, 2026

Cloud Essentials - IBM, 2026

Introduction to Data Science - Cisco, 2026

Introduction to Cybersecurity - Cisco, 2026

Professional Development - ALX, 2025
